

BIM World MUNICH - the international platform for the digitalization of the construction, real estate and facility management industries

Munich, 04.10.2024 **BIM World MUNICH**, the international event for the digitalization of the construction, real estate and facility management industries, will open its doors for the 8th time from **26 - 27 November**.

*More than 250 international exhibitors will present themselves to the **more than 8,000 expected trade visitors** at the fully booked ICM - International Congress Center Messe München.*

This year, BIM World MUNICH is placing a special focus on the role of **taxonomy** and the **sustainable transformation** of the construction and real estate industry. After all, taxonomy is no longer just a buzzword, but a necessity that is relevant in almost every company - driven by legal requirements and the increasing expectations of customers and clients.

At BIM World MUNICH 2024, presentations and panel discussions with industry experts will focus intensively on how the **taxonomy criteria can be successfully implemented** and what contribution BIM can make to more **sustainable planning** and thus ultimately to **reducing the carbon footprint**.

The PwC study from February of this year also shows that this is now working well, according to which 70% of companies have introduced general or project-specific sustainability standards in their companies. However, seriously implementing sustainability in the construction and real estate industry requires the consistent **use of BIM** (Building Information Modeling) across **all life cycle phases** of a building.

Even before the real estate industry's interest in **data models to verify the sustainability of existing and new buildings increased**, BIM World MUNICH had already focused on operations. In cooperation with the leading associations, above all **CAFM Ring e.V.** and **gefma**, **CAFMWORLD** was launched this year to take account of the necessary interlinking of planning and operating data for even more efficient data-driven facility management.

CAFMWORLD awaits visitors as a satellite event at BIM World MUNICH with its **own exhibition area**, a **congress stage** where top-class presentations and discussions will take place over two days and its own **breakout session** in which the latest products from the world of CAFM will be presented.

The topic of sustainability and circularity in the construction industry also plays an important role in Switzerland. In presentations and discussion panels, our neighbors will show how they are committed to circular construction and the crucial role BIM plays in this. BIM World MUNICH therefore welcomes **Switzerland** as an **official partner country** this year.

BIM applications and solutions as well as the creation and maintenance of digital twins are core elements of BIM World MUNICH and are covered with a wide range of topics from **BIM4RealEstate** to **BIM4Circular**, **BIM4Infrastructure**, **BIM4Machines**, **BIM4FM** and **BIM4Netzero**.

With best practice examples, lighthouse projects or application-related presentations, the more than **250 speakers** on a total of **eight stages** will provide an insight into the digitalization of their industry and show how we can work together to master the challenges of our time.

As every year, the exciting final of the **Smart Building / Smart Construction Innovation World Cup®** will take place on November 27. A large number of international start-ups will pitch on the first day in front of a high-ranking jury of experts from 11:00 on the Innovation Stage for one of the coveted places among the “Top 8” of the **Smart Building / Smart Construction Innovation World Cup®** on the main stage. The “Smart Building / Smart Construction Innovator of the year 2024” will be chosen there from 11:30 a.m. on day 2.

Press representatives can obtain accreditation via the following link and will then receive their ticket to BIM World MUNICH 2024 <https://www.bim-world.de/press-accreditation>

About BIM World MUNICH:

Since 2016, BIM World MUNICH has been the international platform for all players involved in the digitalization of the construction, real estate and facility management industries. The annual event in Munich consists of a two-day international congress on eight stages and a trade fair with integrated open forums, as well as the BIM Town Innovation Area with pitch sessions and the presentation of the Smart Building/Smart Construction Innovation World Cup® Award. With over 8,000 key players in the industry, as well as numerous innovative start-ups and over 250 speakers, BIM World MUNICH brings together the entire BIM ecosystem and is THE meeting place for all industry players involved. The 8th BIM World MUNICH will take place on November 26 and 27, 2024 at the ICM in Munich.
